

## Trial, Light, and Professional

This page explains what each edition includes. Trial and Light share the same engineering screens. Professional adds the extra tools listed below.

### Trial

Trial runs for 28 days. The computer must stay on the internet while you use it.

You can add 7 signal generators and 7 other visual instruments. Text boxes are unlimited and are not counted.

One Trial licence runs on one computer. Move Application is not included.

Included: connect with Virtual bus or a supported adapter, import an EDS file, Object Dictionary, visual instruments, Live Graphs, Trace, SDO, PDO, and the network tools.

Not included: Python Studio, CAN AI, Dashboard Builder, EDS validation, EDS compare, EDS quality, compliance, and device commissioning.

### Light

After the licence is activated, Light works offline.

You can add 15 signal generators and 15 other visual instruments. Text boxes are unlimited and are not counted.

One licence runs on one computer. Move Application can move that licence to a different computer.

Light includes the same screens as Trial.

Not included: Python Studio, CAN AI, Dashboard Builder, EDS validation, EDS compare, EDS quality, compliance, and device commissioning.

### Professional

After the licence is activated, Professional works offline. CAN AI Online needs the internet only while you use that mode.

There is no limit on signal generators or visual instruments. Text boxes are unlimited.

One licence runs on one computer. Move Application can move that licence to a different computer.

Professional includes every Light screen, plus Python Studio, CAN AI, Dashboard Builder, EDS validation, EDS compare, EDS quality, compliance, and device commissioning.

## Side by side

|                                  | Trial     | Light        | Professional |
|----------------------------------|-----------|--------------|--------------|
| Internet while you work          | Required  | Not required | Not required |
| Signal generators                | 7         | 15           | No limit     |
| Other visual instruments         | 7         | 15           | No limit     |
| Text boxes                       | Unlimited | Unlimited    | Unlimited    |
| Move to another computer         | No        | Yes          | Yes          |
| Connect, EDS import, Trace       | Yes       | Yes          | Yes          |
| Object Dictionary, SDO, PDO      | Yes       | Yes          | Yes          |
| Live Graphs                      | Yes       | Yes          | Yes          |
| Python Studio                    | No        | No           | Yes          |
| CAN AI                           | No        | No           | Yes          |
| Dashboard Builder                | No        | No           | Yes          |
| EDS validation, compare, quality | No        | No           | Yes          |
| Compliance                       | No        | No           | Yes          |
| Device commissioning             | No        | No           | Yes          |

Live Graphs is the fast plot. Dashboard Builder is a separate Professional screen for gauges and saved panels.
